STRIVING FOR EXCELLENCE

PT MULTI ARTHAMAS GLASS INDUSTRY

MAGI is an established processed glass manufacturer with a strong reputation for producing reliable, high-quality products with a focus on perfection and beauty. MAGI's foremost priority is delivering high-quality glass products that enhance the function and beauty of the surfaces on which they are used. MAGI is the source of various quality tempered glass, laminated glass, insulated glass, bent glass, ceramic fritted glass, and custom specialty glass. Upholding the values of quality, our company strives for excellence in all our products.

OUR PRODUCTS

MAGITEMP

MAGITEMP is glass that has been strengthened by heating regular glass to a temperature of up to 700°C. MAGITEMP is 3-5 times stronger than regular glass. Tempered glass is safe because it doesn't break easily. When it does break, it shatters into small, blunt pieces.

Furniture

Frameless Door

VELARO

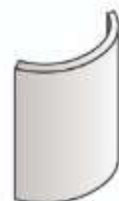

VELARO is decorative glass made by printing on glass using screen printing or digital printing techniques before it is tempered. Its design can be customized to meet the needs and preferences of customers, making your space look distinctive and unique.

Facade

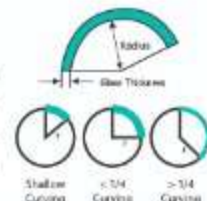

Shower Cubicle

MAGIBEND

Various types of curved glass are widely used in architecture. MAGIBEND is a practical product designed for complex curved shapes. It is suitable for both interior and exterior applications, including facades, corner windows, or skylights.

Facade

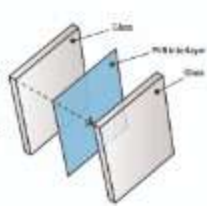

Glass Railing

MAGISAFE

MAGISAFE is a solution for security and safety. If you're looking for safe glass products, MAGISAFE is the perfect choice. The Polyvinyl Butyral film acts as an interlayer, keeping the glass intact if it breaks.

Facade

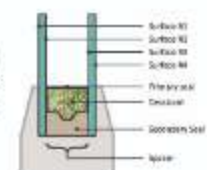

Glass Railing

ENVIRO

ENVIRO provides excellent thermal insulation and noise reduction. It consists of two or more layers of glass separated by aluminum spacers around the edges and sealed hermetically.

Refrigerator Display

Laboratory Room

OUR PRODUCTS

SMARTGLASS

SMARTGLASS is glass that uses PDLC (Polymer Dispersed Liquid Crystal) technology. This technology alters the molecular structure of the PDLC when an electric current is applied, allowing the glass to switch between a frosted state and a transparent state.

Condition when it is OFF

MAGISAFE+

More Feature from Magisafe

EXTRA STRONG

Heavy duty protection

MAGISAFE+ Extra Strong can be used in various architectural applications where a combination of strength and safety is required. This product is ideal for structural applications, roofs, balustrades, partitions, swimming pools, and glass floors.

SOUND CONTROL

The sound of the vehicle is muffled by Magisafe

MAGISAFE+ Sound Control offers excellent sound reduction. It provides a noise reduction of 5 dB higher compared to laminated glass with standard PVB film.

SOLAR SAFE

96% absorb infrared heat energy

MAGISAFE+ Solar Safe is suitable for use in windows and skylights. Most of the energy from the sun contains infrared radiation. This product reduces 96% of infrared radiation, allowing only about 21% of heat to be transferred.

BULLET RESISTANCE

MAGISAFE Bullet Resistant after being fired by a bullet

Test Standards :

- Underwriter's Laboratories (UL) 752 Indoor Standard for Bullet Resisting Equipment
- National Institute of Justice-NIJ 0108.01 Ballistic Resistant Protective Materials
- EN 1063 Glass in Building: Security Glazing: Testing and Classification of Resistance Against Bullet Attack
